Sutter
PROFESSIONAL

Strategy & Vision

A man in a dark suit stands with his back to the camera, looking out over a vast, green, hilly landscape. He is standing on a concrete ledge or platform. To his left, an office chair is visible. On the ledge in front of him, there is a small cup and some papers. The sky is blue with some clouds. The overall scene suggests a moment of reflection or vision.

Our Company is an asset that we are temporarily looking after for the benefit of future generations. **Just like the environment.**

For this reason, at Sutter, we are driven by the need to define, before and better than our competitors, a new balance between the continuing demand for effective and innovative solutions and the need to deliver, for ourselves and for our children, a genuinely safer, healthier and more natural environment.

It is time for sustainable innovation.

A new chapter is opening for a Company and family that for 150 years has met the challenges of change, putting their talents at the service of the common good, delivering performance where others merely discuss their aspirations.

Because we are passionate about the magic of chemistry, **but we are even more passionate about people and the lives they lead.**

(Aldo Sutter)

THE ZERO IMPACT CLEANING FORCE which respects environment and people

Our mission is aimed at combining the development of high performing formulas while respecting both nature and people. For that reason, during the years we have been investing a significant part of our resources in the creation of value and sustainable innovation.

The **Zero** line was born in 2015 and now, thanks to research and to the significant results achieved, we have widened our range of products by increasing the usage of natural origin raw materials obtained from renewable sources.

The product line includes Zero and Zero Extra products. The Zero products do not have **CLP pictograms**, therefore they are not classified as hazardous (Reg. 1272/2008/EC CLP), the Zero Extra products, in order to guarantee the high cleaning standards required in special applications, are fully biodegradable and from vegetal origin but still contain some active substances which require the application of some pictograms. Their application, in usage conditions, is however safe.

Now, Zero and Zero Extra represent - within the Professional segment - the most complete vegetal origin product line which can meet all cleaning requirements on the market in an effective way and with a special attention for the environment. Moreover, the colour code - associated both to the formula and to the label- makes each product easily identifiable for its specific usage in each working area (floors, furniture, kitchen, bathroom and personal care): in short, more and more...

...a true force of nature
for your cleaning.

NATURALLY EFFECTIVE formulas with vegetal origin raw materials

ALKYLPOLYGLYCOSIDES (APG)

They come from the processing of renewable sources (for examples, potatoes and corn);
They are surfactants: they change the surface tension on dirt, helping its solubilisation and removal;
They have emollient properties (they are used in cosmetics). They are not dangerous for the environment.

COCONUT SOAP

It comes from coconut oil saponification process (salification);
It contains glycerine which reduces skin irritation thanks to its emollient action;
It has a solubilising action on greasy dirt (organic residues);
It helps the chemical stabilisation of formulas.

ETHYL ALCOHOL

It comes from sugar beet fermentation;
It is used as solvent and sanitiser and helps solubilise dirt on surfaces by mechanically removing germs and bacteria;
It favours evaporation: no rinse needed on the treated surface.

LACTIC ACID

It is a vegetal origin product coming from sugar beet fermentation processes. It can be used as limestone remover and PH regulator. Its name comes from the fact that the microorganisms (bacteria) involved in the fermentation from which it originates are called lactic.

CITRIC ACID

This substance is present in nature in many vegetal organisms, for example it is contained in significant quantities in lemon and orange juices;
Its primary function is the removal of limestone;
When it is used as pH stabiliser and regulator, it ensures the correct product action.

FRAGRANCES

All the products have a pleasant fragrance (for examples apple, apple vinegar, water lily, pine);
All the fragrances used in the Zero line comply with ECOLABEL requirements and IFRA standards.

WITH VEGETAL ORIGIN
INGREDIENTS

The right solution for all environments

Following Sutter Professional long tradition, we have created a complete line which gives the professional user the opportunity of using those products for the cleaning of any type of surface and environment. Thanks to its exclusive formulas which combine effectiveness, easy dosing and affordable costs, the new Zero line guarantees high performance with small quantities of product.

Zero line is not only used for surface cleaning but also for disinfection and personal care (hands and body washing).

Floors

A range of detergents for all types of surface and dirt, with high quality performances and pleasant fragrances, in compliance with ECOLABEL requirements and IFRA standards. Effective solutions for floor treatments, caring for the materials it is made of.

Furniture

Furniture, glasses and surfaces in all your house will shine naturally with the Zero line products. You will obtain excellent cleaning results and at the same time respect for people and environment safety.

Kitchen

Hygiene and cleaning are very important in the kitchen. Our formulas with vegetal origin ingredients have been designed specifically to ensure safety, hygiene and disinfection in food areas and on all the surfaces which come into contact with food.

Bathroom

The bathroom is the symbol of cleanliness in tourist accommodations, therefore specific Zero line products have been designed to ensure an excellent cleaning and sanitising action on all bathroom surfaces.

Hands and Body

Hands washing is one of the most important actions to ensure health and safety. The Zero line Lotion products (cream and foam) meet these requirements. They are also delicate on the skin and make it soft and pleasantly perfumed.

BIODEGRADABLE*

The surfactants contained in the ZERO line are fully biodegradable both in aerobic conditions (with oxygen) and in anaerobic conditions (without oxygen).

PHOSPHATE
FREE
NICKEL

WITHOUT NICKEL, COBALT AND CHROMIUM

The “heavy metals” cause allergic contact dermatitis due to the usage of detergents. They can come either from impurities in the substances used or from residues of the production cycle of the product.

0.01 ppm (mg/kg): allowed limit in ZERO

5 ppm (mg/kg): concentration limit considered as “safe”.

We ensure that this limit is never exceeded through a constant monitoring of production batches.

ALLERGEN-FREE**

The Zero line products do not have a warning label for allergic sensitisation. Some of the fragrances used do not contain any of the **26** most common **allergens** used in the formulas for detergents; others contain a very low level, which is not relevant for the hazardousness of the mixture.

PARABEN-FREE

They are now classified as endocrine disruptors, their usage in cosmetics is limited to some product categories. Although their usage is not prohibited for cleaning products, **no paraben is used as preserver** in the Zero line.

DERMATOLOGICALLY TESTED

The ZERO LINE products on which it has been possible to carry out the patch test (highly acid/alkaline products have not been tested) proved an excellent skin tolerability.

SUTTER GROUP DOES NOT CARRY OUT ANY TEST ON ANIMALS.

PRODUCTS NOT CLASSIFIED AS HAZARDOUS***

The substances contained allow the product not to be classified as hazardous (Reg. 1272/2008/EC CLP)

*With raw materials of vegetal origin fully biodegradable (The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.)

** Regulation 648/2004/EC and successive ones

***Classification valid only for Zero line and not for Zero Extra line

A line that is second to none

The professional user of chemical products tends to think that vegetal origin products cannot have the same performance as traditional products.

Through research and the sharing of the **Natural Force** vision with the world main raw material producers, Sutter has been able to obtain a complete line of high performing products, **certified by analysis laboratories with ISO 17025 accreditation.**

The Ecolabel licence means environment respect and effectiveness tested against market-leader products with same or higher dirt removal power.

EXAMPLE OF PERFORMANCE TEST FOR **AMBER** PRODUCT (DEGREASER):

COMPARISON OUR PRODUCT VS. REFERENCE PRODUCT		
	RESULTS	PERCENTAGE VALUE
EVALUATION	NUMBER OF COMPARISONS	%
AMBER lower than reference product	1	2,5
AMBER equal or higher than reference product	39	97,5
Percentage of results where AMBER effectiveness has been evaluated as equal/better than the reference one		97,5

SCENTED MULTI-PURPOSE NATURAL DETERGENT

Zero
natural force

EU ECOLABEL:
IT/020/009

- ✓ EFFECTIVENESS TESTED AGAINST MARKET LEADER
IN A ISO 17025 CERTIFIED LABORATORY.
- ✓ PRODUCED WITH RAW MATERIALS FROM NATURAL ORIGIN,
FULLY BIODEGRADABLE*
- ✓ NO CLP PICTOGRAMS

FEATURES

Universal multi-purpose detergent for the daily cleaning of hard surfaces. Excellent also for scrubbing machine. Pine scent with eucalyptus essential oil, delicate and long-lasting fragrance. It contains vegetal origin raw materials (e.g. surfactants, solvents) coming from the processing of corn, potatoes, sugar beet and coconut oil. Phosphate and nickel-free (less than 0.01 ppm). Dermatologically tested product (human patch test - not tested on animals). The absence of CLP warning signs means that the product is safe both for the operator and the environment, provided it is used according to the usage instructions and to the other information on the label.

(*) The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.

EU ECOLABEL:
IT/020/009

- ✓ EFFECTIVENESS TESTED AGAINST MARKET LEADER
IN A ISO 17025 CERTIFIED LABORATORY.
- ✓ PRODUCED WITH RAW MATERIALS FROM NATURAL ORIGIN,
FULLY BIODEGRADABLE*
- ✓ EFFECTIVE AND RAPID CLEANING ACTION. QUICK-DRYING

FEATURES

Fast-acting detergent, highly effective for ink and marker pen stains and for greasy stains. Guarantees an instant and effective cleaning action on the most stubborn stains. Leaves surfaces clean and free of traces. Eliminates the most stubborn stains such as indelible felt-tip pens, ink, etc. from hard surfaces. Ideal for all periodic and comprehensive cleaning where no rinsing is required. Floral scent, allergen-free (Reg. 648/2004), delicate and long-lasting fragrance. It contains vegetal origin raw materials (e.g. surfactants, soap) coming from the processing of coconut oil. Phosphate free.

(*) The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.

Sutter
PROFESSIONAL

WASH Plus

NATURAL DETERGENT FOR MANUAL DISHWASHING

EU ECOLABEL:
IT/019/013

FOOD
AREA

- ✓ EFFECTIVENESS TESTED AGAINST MARKET LEADER IN A ISO 17025 CERTIFIED LABORATORY.
- ✓ PRODUCED WITH RAW MATERIALS FROM NATURAL ORIGIN, FULLY BIODEGRADABLE*
- ✓ EFFECTIVE AGAINST GREASY DIRT

FEATURES

Detergent for manual dish washing. Ideal to remove greasy dirt. Thanks to its formula, the product is effective without generating too much foam. It contains vegetal origin raw materials (e.g. surfactants) coming from the processing of corn, potatoes and coconut oil. Colourless and fragrance-free. Phosphate and nickel-free (less than 0.01 ppm). Recommended also for food area.

(*) The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.

DESCALER Plus

NATURAL DESCALING DETERGENT

EU ECOLABEL:
IT/020/009

FOOD
AREA

- ✓ EFFECTIVENESS TESTED AGAINST MARKET LEADER IN A ISO 17025 CERTIFIED LABORATORY.
- ✓ PRODUCED WITH RAW MATERIALS FROM NATURAL ORIGIN, FULLY BIODEGRADABLE*
- ✓ IDEAL ALSO FOR DISHWASHER DESCALING

FEATURES

Descaling detergent with natural origin organic acids (citric acid and lactic acid). Recommended for the removal of limestone residues from polished surfaces, taps, stoneware, ceramics and for dish-washing machine descaling. It contains natural origin raw materials (e.g. surfactants, acids) coming from the processing of glucose, corn and potatoes. Phosphate and nickel-free (less than 0.01 ppm). Colourless and fragrance-free. Recommended also for food area.

(*) The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.

LACTIC

DETERGENT-MULTIPURPOSE NATURAL ACID
DISINFECTANT*

- ✓ **BIOCIDAL EFFECTIVENESS IN COMPLIANCE WITH THE FOLLOWING STANDARDS: EN1276, EN1650, EN13697 AND EN 14476+A1****
- ✓ **PRODUCED WITH RAW MATERIALS FROM NATURAL ORIGIN, FULLY BIODEGRADABLE*****
- ✓ **WITHOUT QUATERNARY AMMONIUM SALT, IDEAL FOR FOOD AREA**

FEATURES

Multi-purpose disinfectant for all washable hard surfaces: houses, nursing homes, kindergartens, industrial rooms, technical laboratories, floors, rooms, furniture, toilets, bathrooms, worktops, waste bins and warehouses. The product can be used on surfaces in contact with food (rooms/equipment for production and rooms/equipment for storage). It contains vegetal origin raw materials (lactic acid). Recommended also for food area. **Biocidal authorization number EU-0006622-0010.**

(*) Regulatory requirements surrounding the biocidal registration may vary according to each country.

(**) Biocidal effect at 20°C - Dilution: ready to use - Contact time: 5 min: Bactericidal action according to EN 1276 and EN 13697 for strains: *Pseudomonas aeruginosa*, *Staphylococcus aureus*, *Enterococcus hirae*, *Escherichia Coli*. Additional Bactericidal action according to EN 1276 for strains: *Salmonella enterica* subsp. *salamae* serotype *Tranoraga*, *Listeria monocytogenes*. Yeasticidal action according to EN 1650 e 13697 for strains: *Candida Albicans*. Virucidal action according to EN 14476+A1 for Influenza virus A/H1N1 EN 1276.

(***) The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.

RUBY

SCENTED DESCALING NATURAL DETERGENT

Zero
natural force

EU ECOLABEL:
IT/020/009

- ✓ EFFECTIVENESS TESTED AGAINST MARKET LEADER
IN A ISO 17025 CERTIFIED LABORATORY.
- ✓ PRODUCED WITH RAW MATERIALS FROM NATURAL ORIGIN,
FULLY BIODEGRADABLE*
- ✓ NO CLP PICTOGRAMS

FEATURES

Descaling detergent based on natural origin organic acid (citric acid). Ideal for bathroom and toilet. Recommended for daily cleaning of taps, bathtubs, showers, tiles etc. The daily usage of Ruby, thanks to anti-redeposition agents, helps prevent scaling. It contains vegetal origin raw materials (e.g. surfactants, acids, solvents) coming from the processing of sugar beet and coconut oil. Fruity scent, allergen-free (Reg. 648/2004). Phosphate and nickel-free (less than 0.01 ppm). Dermatologically tested product (human patch test - not tested on animals). The absence of CLP warning signs means that the product is safe both for the operator and the environment, provided it is used according to the usage instructions and to the other information on the label.

(*) The surfactants contained in the products are easily, quickly and fully biodegradable in compliance with Regulation 648/2004/EC.
